

The Solution For Leaking Showers

NO TILES REMOVED

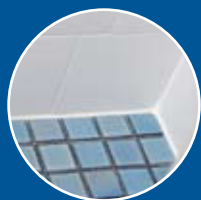

The hydrobarrier penetrates below the surface and seals the grout, porous tiles and hairline cracks

1. Remove grout from shower walls
2. Replace with anti fungal grout
3. Apply hydro-barrier to all tiles and grout
4. Prepare junctions of shower with high speed diamond tool
5. Apply SealRight product to all junctions of shower
6. Seal floor waste
7. Seal shower screen

Our specialised sealants seal waste pipes and wastes

The Diamond Seal tools prepare the junctions. SealRight is applied for a perfect seal

Other Services Available

OBLIGATION FREE QUOTE

Although we offer a free of charge quotation, our staff can usually diagnose the condition of the showers or shower baths over the phone, as 95% of showers or shower baths will fall under our standard pricing.

WHY IS OUR SYSTEM SO EFFECTIVE?

In its simplest terms, we have designed a combination of specialised tools, products and procedures that allow our company to stop water on the surface of the shower cubicle or bath, 100% waterproofing the area without the need to remove tiles.

This obviously saves a lot of time, money and hassle, in that each shower can be sealed in 2^{1/2} to 4 hours and is usable the next day.

WARNING - A leaking shower can cost \$1000's! Termites are attracted to wet areas.
